BUILDING BETTER

FUTURES FOR ALL

For over three decades, Caresfield has been on a mission to build better futures for all. Since our founding, we have provided healthcare organizations with innovative products and a winning blend of price, quality and service, all while staying true to our core beliefs that a supplier should act with accountability, find inspiration in integrity, and perform our work positively. In short, we treat our customers as we would want to be treated, while providing the expertise and trust that you would expect from a 30-year industry veteran.

1990

TODAY

Founded in Pembina, ND

Initially selling paper products out of his home office, our founder, Warren Griffith, quickly established a flourishing label business with a diverse offering of products for healthcare applications. Since our beginning, we've only strengthened our commitment to what really matters: humanity, connection, communication, and care.

The original Supplier of Brightly Colored Tourniquets

Caresfield was the first supplier to launch a tourniquet line with a variety of bright colors to reduce the risk of leave-on accidents. We've continued to innovate with an offering of specimen collection products that address the needs of specialty patients and make it easier for healthcare specialists to do their jobs.

New Headquarters in Lakeville, MN

Surrounded by world-renowned leaders in healthcare, we opened a 45,000 square foot manufacturing facility outside of Minneapolis. Managed from this newly established headquarters, our state-of-the-art manufacturing, coupled with same-day shipments, keep your facility stocked with some of the highest quality products on the market today.

PlatinumCode Becomes Caresfield

With continued dedication to our loyal customers and GPO partners, our company re-branded from PlatinumCode to Caresfield. Our dedication to people-first support and our belief in the power of humanity, connection, communication and care guided us through our first 30 years. The Caresfield brand will now serve as our guide to continue nurturing relationships for the next 30 years.

Addressing a Continuum of Care

Caresfield identification and specimen collection products are found in thousands of healthcare facilities across the United States. With our patient ID solutions and disposable tourniquets, we strive every day to enhance communication and improve the safety of healthcare employees and patients. Because it's your goal to increase the quality of care while reducing costs, it's our goal to help you get there.

OUR PROMISE
MOST TRUSTED & RESPONSIVE PARTNER

Sometimes It's About More Than a Product

Caresfield is large enough to innovate and meet your demands, but not so big that the experience lacks humanity. You may have been left behind or disappointed by other suppliers that didn't understand your needs, but we will listen and we will deliver. When you buy from Caresfield, you not only get quality products, but you will receive:

- Immediate support when you call or chat during business hours (no automated systems)
- A proven process to cross-reference your existing items, including free samples for evaluation
- The winning blend of service, price, and quality

Read on to learn what Caresfield is doing to be the most responsive and trusted supply chain partner for the healthcare industry.

Customer Service Hours: Mon-Fri / 7:30 AM - 5:00 PM CST

952.890.7100 | sales@caresfield.com

Caresfield has established polished processes and systems that ensure accurate and swift delivery from our facility to yours. Our highly trained teams know our products inside and out so that they can assist you in determining which labels and wristbands will fit your information system and satisfy your facility's needs. With so many label and wristband vendors today, we know that it can be difficult to decide, but here are some of the reasons why thousands of facilities across the United States have chosen Caresfield.

Labels Manufactured in the USA

Where do your current labels come from? Are they being sold, then re-sold to you? Caresfield ensures that you are getting labels manufactured by us in Minnesota on our state-of-the-art presses.

Healthcare Focused

We know healthcare. We have been living and breathing it since 1990. When you call, we know what you mean when you say you need a red-bordered label for your Laboratory Information System, and we will help you pinpoint which one works best.

Same-Day Shipping

We stock millions of labels and patient ID wristbands on our warehouse shelves, ready for immediate shipment. Orders placed by 2:00 PM CST will be shipped out the same day. Some restrictions do apply for non-stocked labels, such as custom sizes.

Shelf Packaging

We use specially designed boxes for our identification products that are made for stacking, allowing you to better organize your stock and save valuable space.

Plastic Wrapped

Each of our label rolls are wrapped in plastic to ensure you receive labels free of dust or unwanted residue. This also helps to protect the labels on your shelf as well as the investment you have made with your printers.

Identity Cores

Ever wonder where your labels come from? Our labels are all marked with a distinct Caresfield core to help you better identify where to get your next roll. Plus, specialty labels like cryogenic labels, which may look the same but perform differently, are also identified.

Colors and Sizes

Our labels and patient ID wristbands are not just available in one size and one color. We offer a variety of colors to help your facility code what you need and a variety of sizes to fit every system and patient type.

Special Adhesives and Coatings

Sometimes they might seem so on the surface, but not all labels and wristbands are created equal. Our healthcare identification products are specially formulated with materials made to withstand extreme environments in healthcare and our specialty label coatings stand the test of time, chemicals, and widely varying temperatures.

Customization

Can't find what you're looking for? Caresfield can still help. With in-house label manufacturing and an extensive wristband supply chain, we can gladly customize the identification product that will perfectly meet your needs.

www.caresfield.com

Caresfield's Proven Conversion Process

A search for 'label' or 'wristband' in most facility databases returns hundreds and sometimes thousands of items. However, over 95% of those items are obsolete, rarely ever ordered, duplicates, or were only ordered one time for a special project. This huge number of rarely used items makes the typical process of converting to a new vendor using cross-reference spreadsheets very time-consuming and extremely slow. In fact, we've heard it can take 12 weeks or more with other suppliers.

But at Caresfield, we've developed a conversion process for our labels and identification products that completely removes any burden from your organization and that has been proven to be accurate and fast time and time again. Our [Certified Healthcare Label Technicians](#) are standing by to do the heavy lifting. Read on to learn how we can help your facility with a quick and painless vendor conversion in as little as 3 weeks!

Proposal and samples for evaluation guaranteed in 3 weeks or less!

Thank you for taking the time to stop by our departments to collect samples. That was extremely helpful. It has been very easy working with you (Caresfield) and you have been VERY helpful with this conversion process. I appreciate all the work you are doing and appreciate that you are always communicating with us about where we are in the process. I am very excited about the potential cost savings this will bring to our organization! I understand these conversions take time and that a few hands are needed in the works, but you have helped us make it an easy process with our departments.

— Supply Chain Analyst at leading Academic Medical Center

Want Samples Right Now? Contact us with your request.

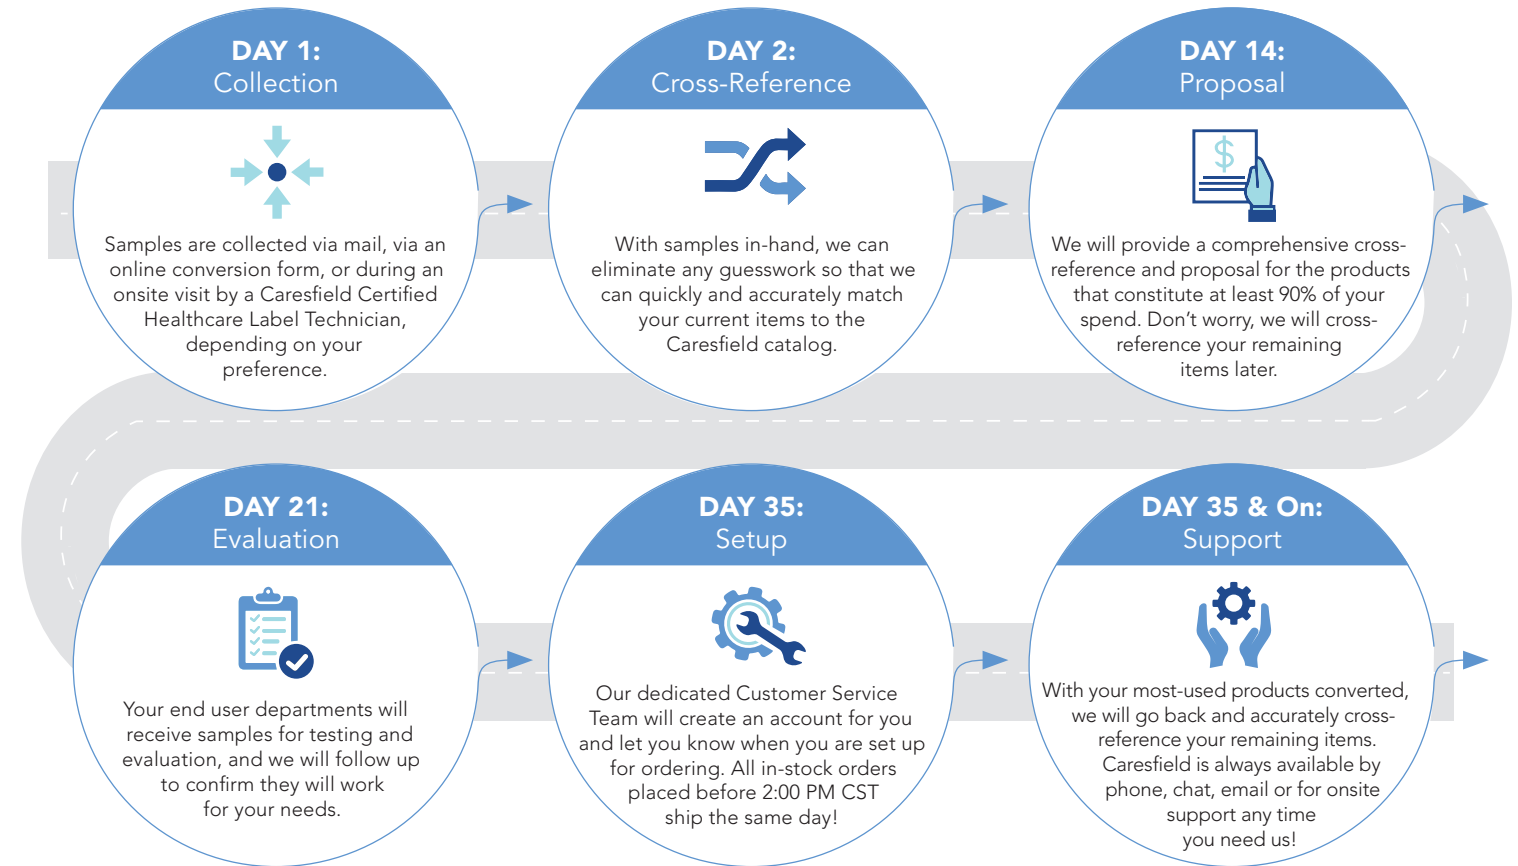

Call us at 952.890.7100. One of our friendly representatives will help you get your samples.

Visit caresfield.com/request-a-sample, complete the form, and we will fulfill your request.

Email your request to sales@caresfield.com

How Does the Caresfield Process Work?

What are the Conversion Methods?

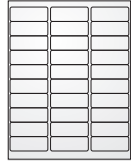

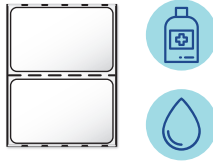

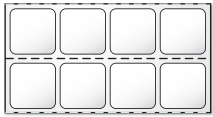

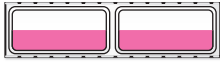

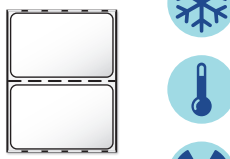

- Mail-in Conversion Kit**
We will send you a conversion kit including prepaid return labels, sample collection envelopes for each department requested, and a simple form for you to identify product specifications required to complete your conversion.
- Online Conversion Form**
You can quickly identify the appropriate specifications for your ID products and upload images of each item through a secure portal.
- On-site Visit**
A Certified Healthcare Label Technician will come to your facility and collect samples in a matter of minutes (pending any travel restrictions).

Visit caresfield.com/convert to get started today!

Labeling Solutions

Ever wonder what the difference between a direct thermal or thermal transfer label is? Or the name of the type of label that does not tear? We are here to answer your questions so you can make the best label choice for your facility. Here's a basic overview of the most common types of labels, but keep reading to learn about our extensive offering of label solutions for your department.

<p>Direct Thermal Labels</p>  <p>Thermal print head activates a thermal dye contained in the label. No ink, toner or ribbon is needed to print a high-quality image. Suitable for applications not requiring a long shelf life.</p>	<p>Laser Sheet Labels</p>  <p>These multi-use labels are made for laser printers, which produce high-quality text and graphics.</p>
<p>Thermal Transfer Labels</p>  <p>Thermal print head transfers ink from a ribbon to create a high-quality image with long-life stability. Ideal for archiving.</p>	<p>Synthetic Labels</p>  <p>Sometimes referred to as non-tear, plastic, or poly labels, these labels are highly durable and hold up in very demanding applications.</p>
<p>Alcohol Resistant Labels</p>  <p>Great for Pharmacy applications, these direct thermal labels won't turn black or smudge when contacted with moisture, alcohols, or hand sanitizer.</p>	<p>Mobile Printer Labels</p>  <p>For mobile printers, these labels either have gaps that are sensed by the printer or have a paper backing marked with a black bar that is sensed by the printer.</p>
<p>Xylene Resistant Labels</p>  <p>A special adhesive stands up to immersion into xylene and other harsh chemicals. Commonly used on microscope slides, tissue cassettes and other specimen storage containers.</p>	<p>Piggyback Labels</p>  <p>A label made up of two labels, where one label sits on top of (or piggybacks) the other label. Commonly used in materials management (inventory labels).</p>
<p>Labels for Harsh Conditions</p>  <p>Cryogenic and Autoclavable thermal labels are made to withstand extreme temperatures, humidity and radiation.</p>	<p>Printed Labels</p>  <p>Labels are provided ready-to-use with printed messages or graphics. Commonly used to communicate warning and alerts regarding patients, materials, or processes.</p>

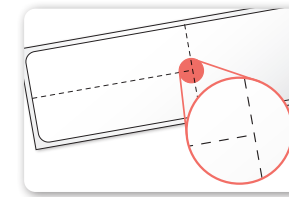

How to Determine your Label's Specifications

At first glance, they might not seem very complex. But labels have a number of properties that must be correctly identified to ensure that a label will meet the needs of the user and work with existing hardware. Here is a helpful questionnaire to assist you in determining your label's specification requirements!

1. Is the label Direct Thermal, Thermal Transfer, Laser, or Dot Matrix?

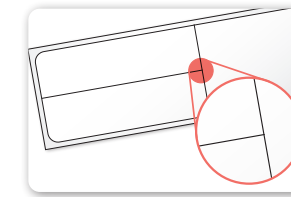

2. Does the label have any perforations or slits on the face?

Perforation

A series of tiny separated cuts through the face of a label that do not penetrate the backing liner. Perforated labels stay connected when peeled and work best on applications that are folded or torn.

Slit

A smooth and continuous cut on the face of a label that does not penetrate the backing liner. Unlike perforated labels, slit labels can be peeled off as smaller, individual labels.

3. Is the label on a sheet or roll?

Fanfolded

Folds in a continuous sheet of labels which resemble the folds in a fan. All fanfolded labels are packaged in cases.

Roll

A continuous sheet of labels is spun around a central core, or spool for easy dispensing or use with dedicated label printers.

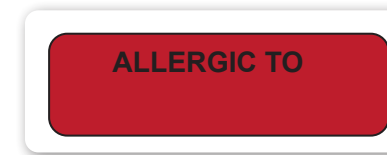

Sheet

Labels are provided in individual, loose sheets.

4. Is the label printed or a system label?

Printed

Label message text is pre-printed so label is ready-to-use.

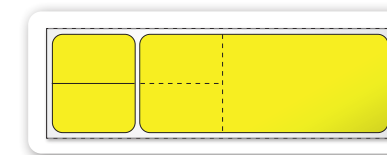

System

Message or barcode is added to the label with a specialized printing system.

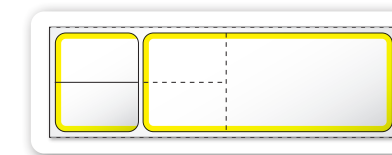

5. Is the label flooded in color or does it have a color border?

Flooded

Label is entirely coated in single color.

Border

Colored border is applied to label. Borders are commonly used to identify STAT items.

6. Is the label being used in a harsh environment requiring special coatings or adhesives?

Xylene Resistant

Alcohol Resistant

Cryogenic

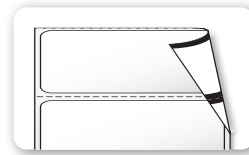

Autoclavable

7. Is there a sensor bar on the backing of the label?

Sensor Bar

Lines on the backing of a label that are detected by label sensors on a printer. As labels move through the printer, the printer mechanism adjusts the label intake to align the labels using these sensor bars.

8. Is the label used with a dot matrix printer?

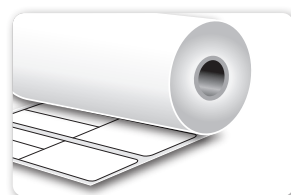

Pin Feed

Round holes punched into the edge of a backing liner maintain the registration of computer imprintable labels during imprinting. The holes line up to the industry specification for dot matrix printers, which use a 1/2 inch center to center dimension.

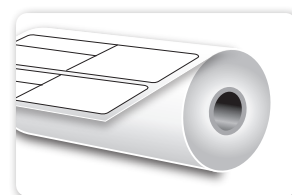

9. Is the label wound in or wound out?

Wound In

Labels are on the inside of the roll.

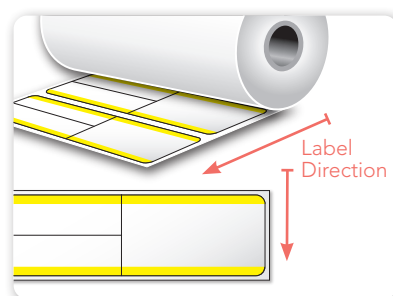

Wound Out

Labels are on the outside of the roll.

10. What is the feed direction?

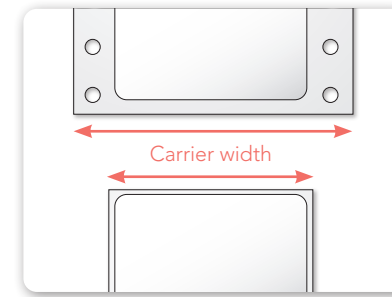

Label Directions

The orientation of a label as it comes off a roll.

11. What is the width of the carrier?

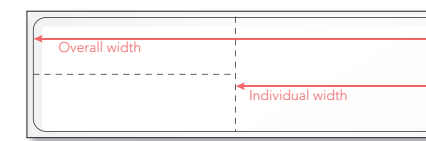

Carrier Width

Width of the backing liner from edge to edge.

12. What is the size of the overall label and any individual labels?

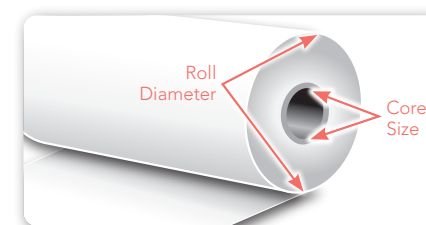

Label Dimensions

The overall dimensions of a label, as well as the internal dimensions of each individual label. Labels are segmented using perforations or slits.

13. What is the core size and roll diameter?

Core Size & Roll Diameter

Core Size
Measurement of the inside diameter of the label core.

Roll Diameter
Measurement of the outside diameter of a complete roll of labels.

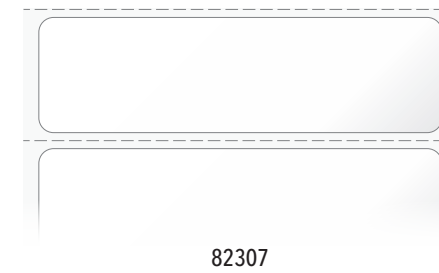

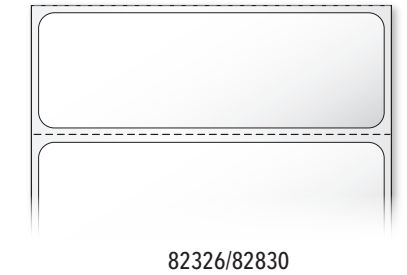

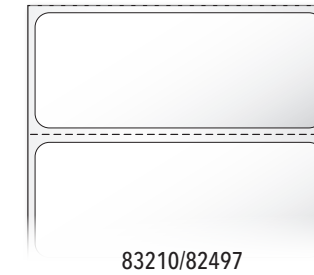

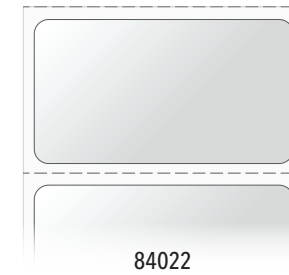

Caresfield's Certified Healthcare Label Technicians (CHLTs) are available to visit you. CHLTs undergo extensive training to become experts of all the major labels and printing systems used by healthcare organizations. A visit from a CHLT typically only takes 15-30 minutes and by nature is quick and non-disruptive. Set up an appointment at info.caresfield.com/clt

ADMISSIONS & REGISTRATION LABELS

From labels for DYMO® printers, to simple laser labels, to a plethora of stocked direct thermal and thermal transfer labels, we have your admitting department covered.

Thermal Transfer Labels

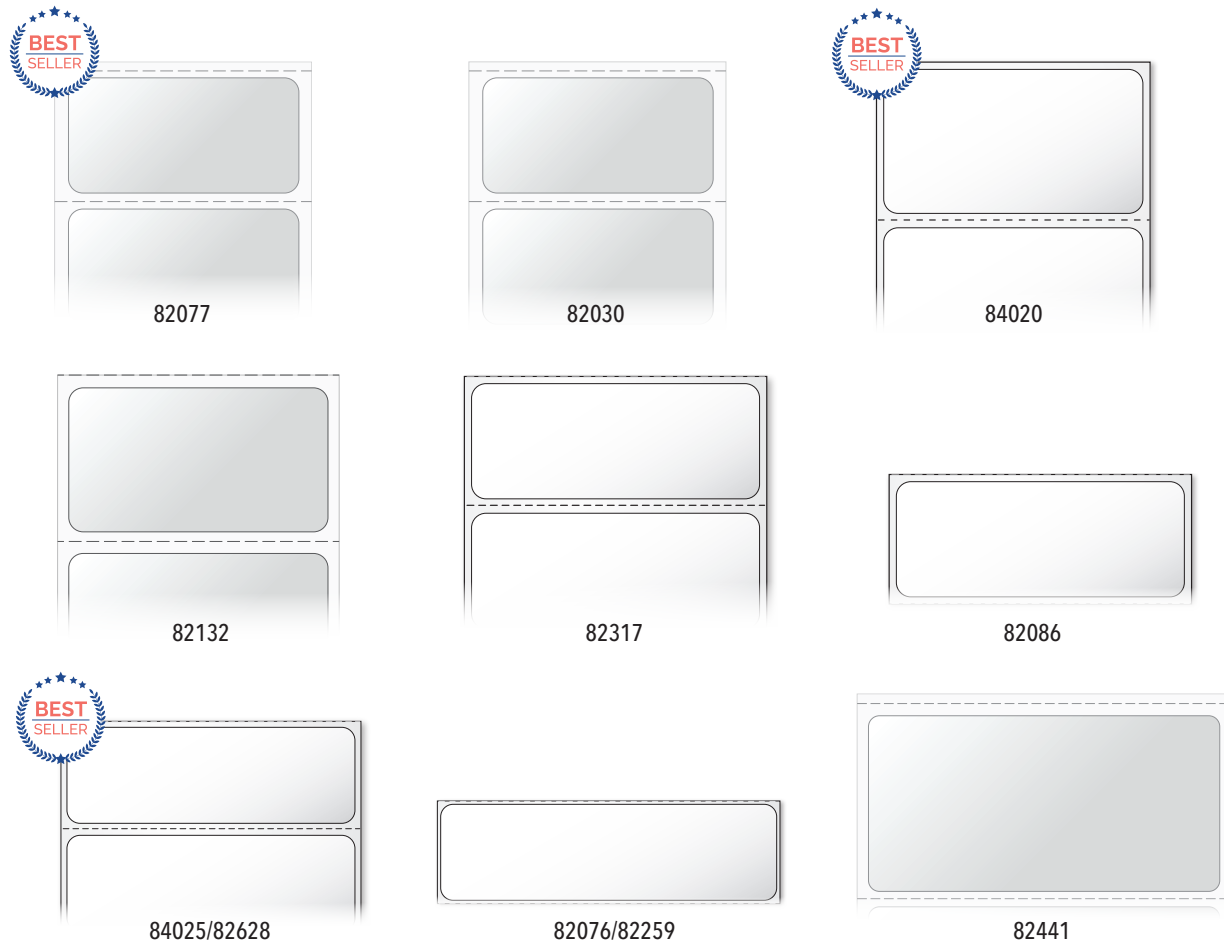

Many other sizes available!

Item #	Label Size	Description	Core Diameter	Qty/Roll	Rolls/Case
84022	2-1/4" x 1-1/4"	Thermal Transfer	1"	1,135	12
83210	2-1/2" x 1"	Thermal Transfer	1"	1,500	12

Laboratories gather the information needed to properly diagnose, treat, and prevent infection or disease in patients. There's no doubt that the role the laboratory plays in healthcare is critical, and so are the labels they use—from laboratory information system (LIS) labels to specialty labels made from cryogenic or xylene resistant materials, we've got you covered.

Compatible with Cerner® Systems

Cryogenic labels are formulated to stay adhered to specimen tubes in extremely cold conditions. They can be applied to frozen specimen tubes coming out of cryogenic freezers as well as specimen tubes being transported on dry ice! Great for frozen specimen processing stations.

Errors in the administration of anesthesia and other medications to patients can have dire consequences. Drug labels and tapes are critical in providing the correct drug name and dosage to each patient during major procedures.

All Anesthesia Labels and Tapes are packaged with 6 rolls per case.

MULTI-PURPOSE LABELS

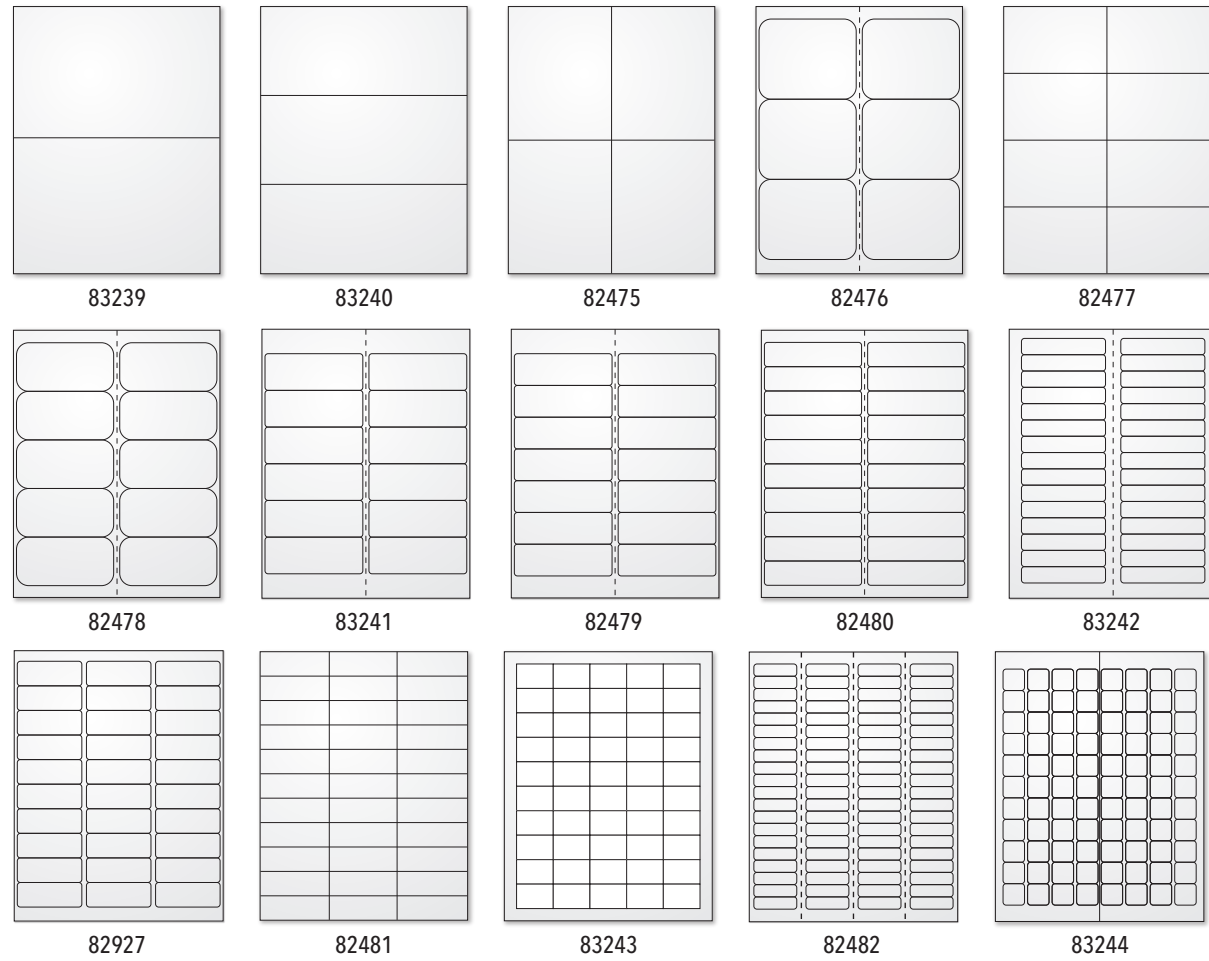

The most commonly used healthcare labels serve different purposes across many departments. Here are some of the most frequently used labels including direct thermal, thermal transfer, laser, as well as labels made specifically for DYMO® printers.

■ These sterile medication labels apply to some of the most common surgical procedures. Additional options are available, any label can be customized, and all sterile labels can be provided in a kit with a marking pen!

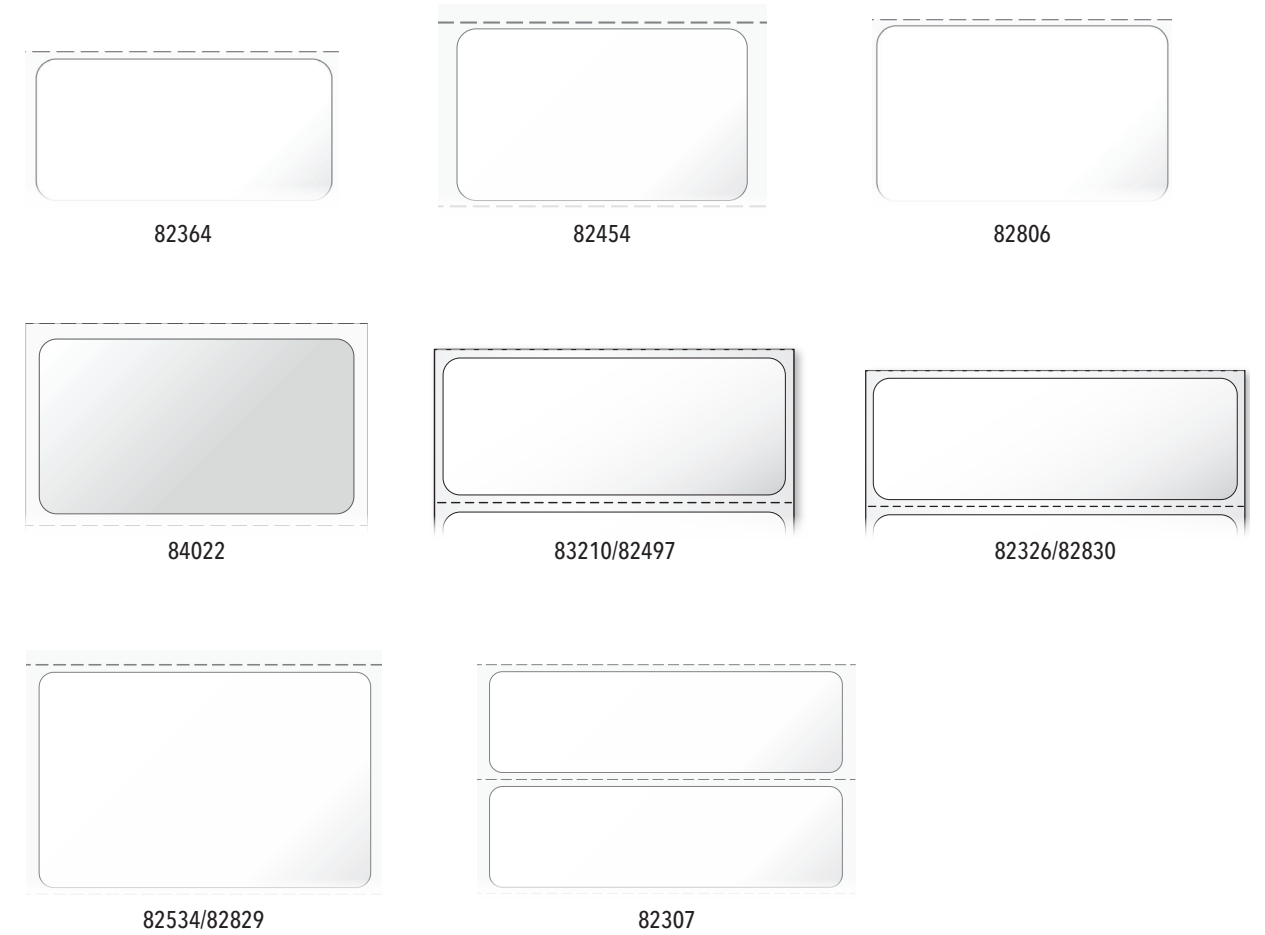

Item #	Label Size	Description	Qty/Sheet	Sheets/Case

Patient ID Solutions

Patient identification is central to keeping your facility's processes efficient and error-free. But with so many types of wristbands that have different printer-compatibility, colors and alerts, closure types, and material durability, it can be hard to know what to order. We are here to help you figure out which solutions are right for your facility—whether that be meeting compliance for alert risks or compatibility with your existing printers and software. Here's a basic overview of the most common types of wristbands, but keep reading to learn about our extensive offering of patient ID solutions.

Laser Label Wristband Combination Sheets

Caresfield offers multiple styles of adult, pediatric, and infant wristband sizes available on laser label sheets. Along with the convenience of both labels and wristbands for a given patient, these provide excellent print quality to protect patient information from bleeding or smearing and an adhesive closure.

Insert Wristbands

Constructed from vinyl, these convenient bands have a pocket to protect insert cards and labels from smudging or wrinkling. Insert wristbands are available in multiple colors and include a one-time clasp closure.

Direct Thermal Wristbands

Heat-activated and made from synthetic materials, direct thermal wristbands feature silver antimicrobial coating and UV overcoat for resistance to liquids. These on-demand bands offer a pressure-sensitive tab closure and tamper-evident slits.

Short Stay Wristbands

Tyvek® wristbands are designed for short term use and are color-specific to quickly notify medical staff of special precautions and medical care needs.

Alert Wristbands

Available in both Tyvek and plastic materials, multiple closure options, and in a variety of sizes, our alert bands are perfect for identifying special risks such as allergies, DNR, limb alerts, hazardous drugs, and fall risk patients. These solutions are available in every alert category and are compliant with state alert color standards.

Shield Wristbands

These wristbands feature a fold-over shield designed to protect patient information. Shield wristbands are available in multiple colors and have a single-use clasp closure.

DIRECT THERMAL WRISTBANDS

Heat-activated and made from synthetic materials, direct thermal wristbands are both easy and durable! These simple-to-use ID bands include a pressure sensitive, tamper-evident adhesive or snap closure.

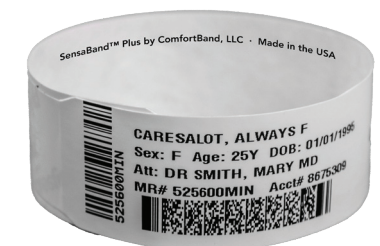

SensaBand™: The World's Most Comfortable Thermal Wristband

SensaBand Plus wristbands are backed with extremely soft, durable Tyvek™ material, making them the perfect band for healthcare applications:

- Waterproof and hand sanitizer resistant
- Natural microbial resistance
- Not made with natural rubber latex
- Works with any roll-style thermal printer
- Tamper evident adhesive closure
- Simple, patented flip-and-peel tab design

90449

90450

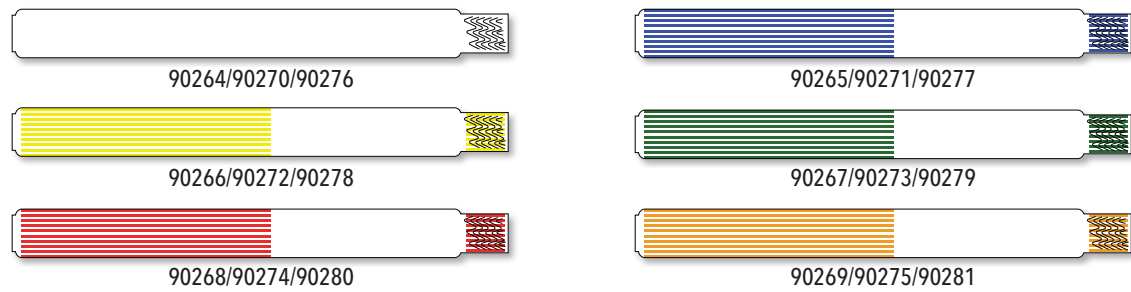

Item #	Wristband Size	Description	Color	Core Diameter	Qty/Roll	Rolls/Box
90449	1" x 11"	SensaBand, Adult Wristband, Wound Out	White	1"	150	2
90450	1-1/8" x 11-1/2"	SensaBand, Adult Wristband, Wound Out	White	1"	150	2

Caresfield's direct thermal wristbands are compatible with most direct thermal printers to provide a text and barcode print quality that you can count on!

- Direct thermal printing provides superior print quality assuring readability throughout the patient stay
- Made from durable direct thermal synthetic material
- Not made with natural rubber latex

LASER WRISTBAND/
LABEL COMBINATION
SHEETS

Caresfield offers multiple styles and sizes of adult, pediatric, and infant laser wristbands. Along with the convenience of providing labels and wristbands combined on one laser sheet, these bands offer excellent print quality protected with clear lamination or special coating to ensure readability of patient information. Easy to use, tamper-evident adhesive closures provides a comfortable and secure fit.

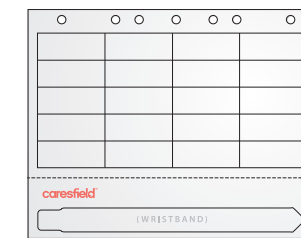

Caresfield's self-laminating, direct-print laser wristbands make it easy for you to print wristbands and labels on one sheet with your laser printer!

- Simple, tamper-evident adhesive closure
- Non-latex

ALERT WRISTBANDS & LABELS

Available in various materials, closure options, and sizes, our alert bands are perfect for conveying critical patient information such as allergies, DNR, limb alerts, hazardous drugs, fall risk and more. Alerts wristbands and labels are available in every alert category, can be customized, and are compliant with state alert color standards.

Plastic/Poly Alert Adult Wristbands

Plastic alert wristbands enable fast identification of patient conditions and risk! Available in wide or narrow configurations, constructed of plastic for long-term durability, and featuring a simple snap closure.

Specimen Collection Products

We may have started with labels, but in our 30-year journey to **build better futures through safer healthcare**, we've grown to be a dedicated solutions provider for the continuum of patient care. We know just how vital specimen collection is in the diagnosis and treatment of a patient. To yield the most accurate results, each and every step of the process must be carefully executed—from tying a tourniquet to carefully transporting the specimen. Caresfield supplies products to get you safely through these steps while ensuring patient comfort, safety, and accuracy.

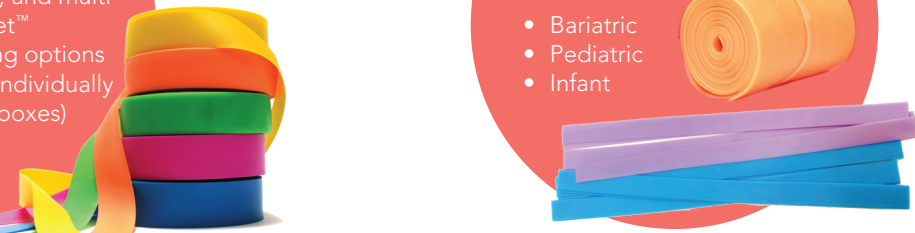

Non-Latex Disposable Tourniquets

5 bright colors reduce the risk of leave-ons

- Textured, smooth, and multi-textured Versaquet™
- Multiple packaging options (flat packs, reels, individually rolled, dispenser boxes)

Specialty sizes provide added comfort to all patients, big and small

- Bariatric
- Pediatric
- Infant

Non-Latex Cohesive Bandages

6 standard color options

- 1", 1.5", 2", 3", 4", and 6" width rolls
- Individual rolls available for single-use applications
- Sterile options

Variety of prints for the kid in all of us

- 6 fun patterns, including hearts, pet paws, butterflies, airplanes, horses, and smiling faces (2")
- Pink or green camouflage designs available in 1", 1.5", or 2" widths

Specimen Transport Bags

Specimen Transport Bags

- Multiple stock colors and sizes
- Back pouch pocket for paperwork
- Easy-tear tear-off and zip-close, or standard zip-close tops
- Optional super-absorbent pad
- Fully customizable design and size (with quantity requirements)

How to Place an Order

For decades, Caresfield has provided healthcare identification and specimen collection products designed to improve the safety of numerous healthcare environments. Thousands of clinics, hospitals, and labs around North America have come to rely on the quality of our products, tenacious customer service, and quick delivery.

We strive to make your ordering experience as simple as possible, so we offer five easy options to place an order:

-  **Email:** Send your order to sales@caresfield.com.
-  **Phone:** Call us at **952.890.7100** to speak with a customer service representative.
-  **Online:** Visit caresfield.com, select *Login* at the top of the page, and complete the form to *Create an Account*. To expedite account approval please have your facility's account number and billing zip code handy. But don't worry—if you don't know those details, our customer service team will connect your account for you.
-  **EDI:** Submit your order via **GHX** (Global Hospital Exchange).
-  **Fax:** Fax your order to **952.520.3787**.

Orders placed for stocked items will ship out the same day if placed by 2:00 PM CST or, if placed after 2:00 PM CST, will ship the following business day.
