

# Versaquet™ Multi-Texture Disposable Tourniquets

Do some of your phlebotomists and nurses prefer textured tourniquets while others prefer smooth? With our new Versaquet multi-texture tourniquets, Caresfield can offer the best of both worlds so you no longer have to choose or order two different items!

One side is **textured**

One side is **smooth**

## SATISFY STAFF PREFERENCE

- Textured side reduces friction and may reduce risk of tearing sensitive skin
- Smooth side provides more skin-to-tourniquet contact and better grip

## SIMPLIFY INVENTORY MANAGEMENT

- A single dual-texture tourniquet replaces textured or smooth tourniquets
- No need to stock multiple tourniquets of the same color and size
